PROFESSIONAL EXPERIENCE	Reddening Games, São Paulo, Brazil <i>Independent Developer</i> Feb 2024 – Present - Currently working on a PC video game to be released on the Steam store. Jusbrasil, São Paulo, Brazil <i>Senior Software Engineer</i> Jan 2023 – Jan 2024 - Researched and built a pipeline for entity resolution with the team that achieved 12 million linked records with a resolution score greater than 0.96 (max 1.0) for 80% of the total records. - Corrected 10 million bad records, eliminated weekly on-call burden, greatly reduced manual support effort to a near zero, and had potential improvements on search and recommendation pipelines. <i>Software Engineer</i> Jan 2021 – Dez 2022 - Researched and worked on an entity resolution problem that helped the company understand which direction to go on creating a system both for internal usage and profit from a valuable user-facing product. - Solved a hard entity resolution token-blocking problem which allowed the company to go from zero to 60% solved entities of the total records. Bipp Global, Rio de Janeiro, Brazil <i>Business Partner, Senior Software Engineer</i> Feb 2020 – Dec 2020 - Worked on tons of features, ranging from back-end services to UI/UX, for a food-delivery/service-contracting mobile application and platform. Grupo Saludem, Araçatuba, Brazil <i>Software Engineering Intern</i> Jan 2019 – Jan 2020 - Developed a clinical appointment-booking mobile application prototype for the AME clinics. - Trained the team to use Git commands and GitHub Workflow. Freelancing, Remote, Brazil <i>Software Developer</i> Jun 2016 – Jan 2019 - Worked on many small projects consisting of process automation and data processing.	
PERSONAL PROJECTS	Fmtlib - Contributed work to the <code>fmt</code> library which made it to the C++ standard library. Sophia - A compiler for an own-designed programming language. - Meant as a teaching project to show the facets of compiler engineering where I code live on Twitch. - Written in Rust and x86 assembly. Cognita - Made a mobile application that optimizes the learning process of any subject by using the principle of spaced repetition. - Used the Flutter framework, and the SQLite embedded database.	
EDUCATION	Centro Universitário Católico Salesiano Auxilium <i>Araçatuba, Brazil</i> <i>Bachelor in Computer Engineering</i> Feb 2015 – Dec 2019 - GPA: 3.45/4.0 - Undergraduate Teaching Assistant for Compilers 2018 - Undergraduate Teaching Assistant for Programming Logic and Algorithms 2015	

LANGUAGES	Advanced English
	Native Brazilian Portuguese
TECHNICAL SKILLS	C, C++, Rust, Python, Golang, Java, C#, Scala, TypeScript, x86_64 Assembly, Dart
	Bash, GNU/Linux, Git, Sysadmin
	Automated Tests, Entity Resolution, Profiling, Compiler Engineering
	Kubernetes, Docker, Kafka
	Firebase, PostgreSQL, SQLite, RESTful APIs
	Apache Spark, Kafka, Hadoop, Redis, Airflow
	Google Cloud Platform: Dataproc, BigQuery, Storage
	Flutter, AngularJS, ReactJS, Spring Boot
